Admin — NIL Agreements	https://himsportsgroup.com/nil-agreement

NIL Agreement Portal — Step by Step

This is your most important tool. Use it every time a new athlete signs with you.

Creating a signing link (your side)

- 1 Go to **himsportsgroup.com/nil-agreement**
- 2 You'll see a PIN entry screen — enter your admin PIN
- 3 Fill in: **Athlete Full Name** (exactly as it should appear on the contract), **Effective Date** (the date the agreement starts), and **Term** (1 year or 2 years)
- 4 Click **Generate Link**
- 5 Copy the link that appears and send it to the athlete — text, email, DM, whatever works

What the athlete sees

- 1 They open the link on their phone or computer
- 2 They read the full 17-section agreement (scrollable)
- 3 They enter their email address — optional, but they should, so they get a PDF copy
- 4 They check the acknowledgment box
- 5 They sign with their finger (mobile) or mouse (desktop), or type their name
- 6 They click **Sign & Submit**

What happens after they sign

- Their signature, timestamp, and IP address are recorded in the database
- **You get an email** at chris@hycheims.com notifying you they signed
- **They get a confirmation email** with the signed PDF attached (if they provided their email)
- The portal shows a confirmation screen telling them you'll be in touch

If something goes wrong

- **"Invalid Link"** — the token in the URL is wrong or has already been used. Generate a new link from the admin panel.
- **"Incorrect PIN"** — double-check your PIN. Contact your developer if you've forgotten it.

- **Athlete didn't get the email** — check their spam folder, and make sure they entered their email correctly before submitting.

Contact Form Inquiries

When someone fills out the contact form at **himsportsgroup.com/contact**, their message is saved to your database. To view all submissions in Supabase:

- 1 Go to <https://supabase.com> and sign in
- 2 Open the **himsportsgroup** project
- 3 Go to **Table Editor** → **inquiries**
- 4 All athlete, brand, and media inquiries are listed there with name, email, type, and message

Adding News / Articles

The News page at **/news** pulls articles from your Supabase database. To publish an article:

- 1 Go to <https://supabase.com> → your project → **Table Editor** → **articles**
- 2 Click **Insert Row**

Fill in the fields:

- **title** — article headline
- **slug** — URL-friendly version (e.g. halvine-dzellat-signs-nil-deal)
- **excerpt** — 1–2 sentence summary shown on the listing page
- **body** — full article content (HTML is supported)
- **author** — your name or staff name
- **published_at** — date to display
- **published** — set to **true** to make it live
- **featured_image** — URL to an image (optional)

Save — the article appears on the site immediately.

Adding Athletes to the Database

The basketball roster at **/athletes/basketball** is hardcoded — ask your developer to add or remove players. Individual athlete profile pages at **/athletes/[name]** are database-driven. To add a profile:

- 1 Go to Supabase → **Table Editor** → **athletes**
- 2 Insert a row with: **name** (full name), **slug** (URL version, e.g. halvine-dzellat), **sport**, **position**, **school** (current school or team), **bio**, **photo_url**, and **published** (set to true to make the profile live)

Things Still Needed Before Full Public Launch

- **Phone number** — Your real phone number needs to be added to the contact page (currently a placeholder). Tell your developer.
- **Coming Soon removed** — The homepage currently shows “Coming Soon.” Your developer flips one switch to go live.
- **Logo** — The nav-bar logo file (gc-logo.png) needs to be uploaded. Tell your developer which file to use.
- **Stats** — The homepage numbers (athletes represented, deal value, etc.) should reflect your real current numbers. Tell your developer what to update them to.

Your Accounts & Access

Service	What it's for	URL
Vercel	Hosts your website	https://vercel.com
Supabase	Your database (agreements, contacts, articles)	https://supabase.com
Resend	Sends your transactional emails	https://resend.com
GitHub	Stores your website code	github.com/LMW-Labs/himsportsgroup

Who to Contact for Changes

Any changes to the website design, pages, or features — contact your developer. Provide them with this file and the **CLAUDE.md** file in the project folder for full context.

For urgent issues with a signed agreement not appearing — check Supabase → **nil_agreements** table directly. Every signed agreement is stored there with the athlete's name, date, signature image, IP address, and timestamp.
